

Water, sanitation and hygiene (WASH)

Welcome to the online course on water, sanitation and hygiene (WASH) technologies in the Arab region

Dear Participants,

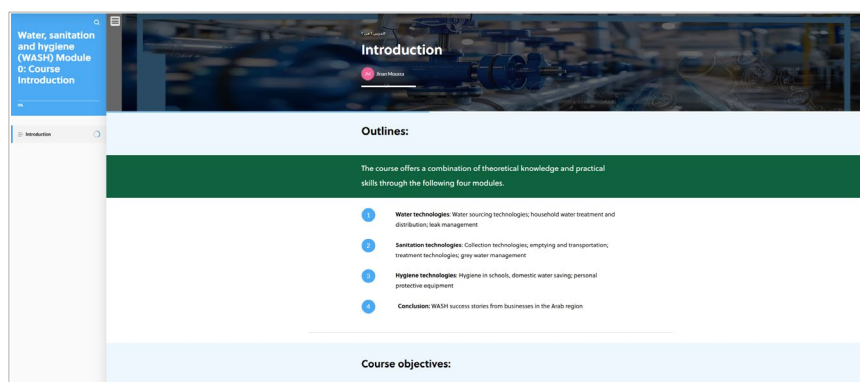

This online course will provide you with the knowledge, skills and entrepreneurial mindset needed to implement and promote sustainable WASH technologies in your communities, ultimately contributing to a sustainable future for the Arab region.

Required Activities

You will need to complete the following **required activities**:

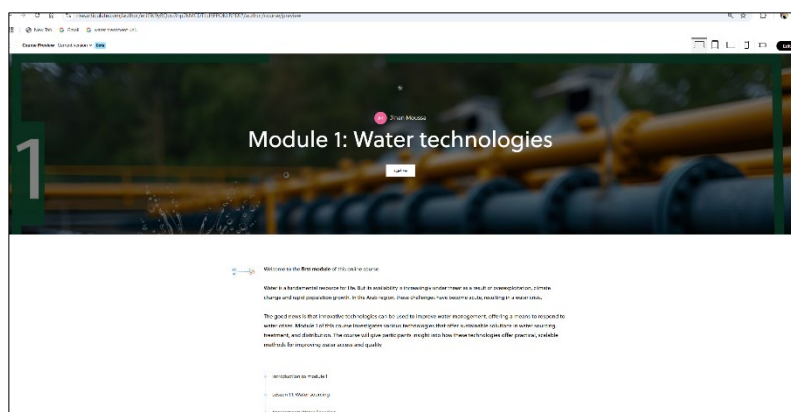

1- Module 0: Introduction to water, sanitation and hygiene (WASH) technologies

You will gain insights into the challenges and opportunities related to water provision.

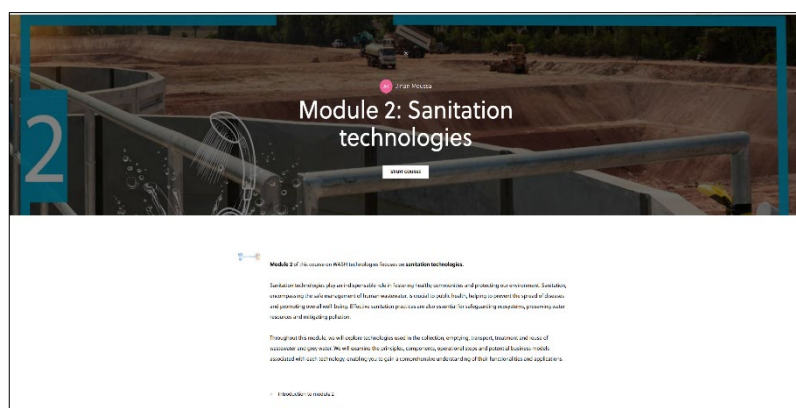

2- Module 1: Water technologies

You will explore various technologies and sustainable business models that offer sustainable solutions in water sourcing, treatment and distribution.

3- Module 2: Sanitation technologies

You will learn about the importance of sanitation technologies in protecting public health and the environment by safely managing human wastewater. You will explore technologies used in the collection, emptying, transport, treatment and reuse of wastewater and grey water.

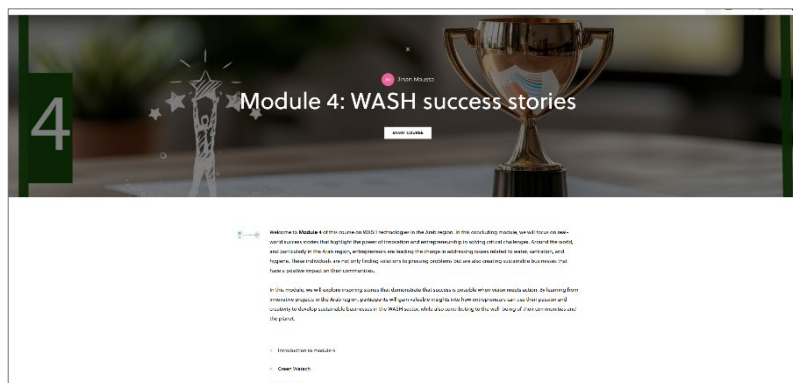

4- Module 3: Hygiene technologies

This module will focus on hygiene practices and technologies that enhance public health. You will learn about innovative methods to promote hygiene in various environments.

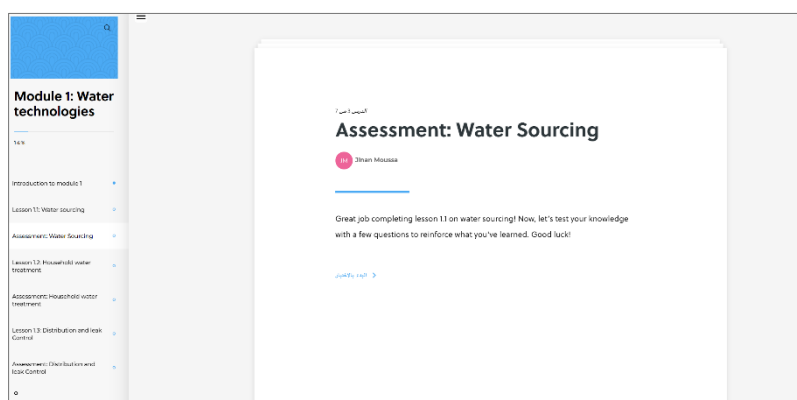

5- Module 4: Success stories and practical applications

This module will showcase success stories and practical applications of WASH technologies. You will explore real-life examples of successful projects within the Arab region.

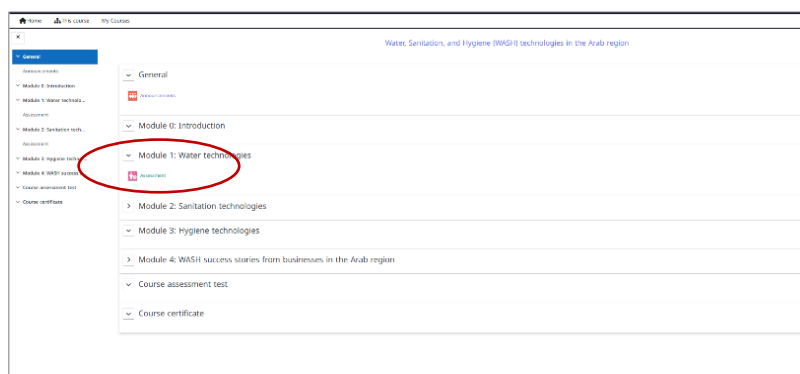

6- Lesson-specific assessments within each module

Each lesson in each module includes an assessment (e.g., Assessment 1, 2, 3, etc.) to evaluate your understanding of the material covered.

7- Final assessment for each module

8- Course final assessment
